-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***EXAMINER'S NOTES***

1. The preliminary amendment filed September 29, 2003 has not been included in the restriction requirement because the preliminary amendment is improper. Because no restriction had been required on this case prior to this Office Action there cannot be any withdrawn claims, specifically claims 16-20 and 31-38. Furthermore, because there has not been any action on this case prior to this Office Action there cannot be any "not entered" claims. Claims 39-43 in particular must be either added as new claims or claim 44 must be renumbered claim 39, because currently claims 39-43 are not claims in the case because they have not been added to the case. The preliminary amendment in a new case regardless of whether it is a continuation of another case, cannot depend on other cases to determine the limitations in the new and amended claims. In response to this election/restriction, Applicant must elect one of the three inventions listed below and if changes to the original claims are desired, a new amendment should be filed with the election reflecting those new changes taking into consideration the comments above with regard to the current preliminary amendment that is not being considered.

***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-15 and 21-30, drawn to a plastic fuel tank, classified in class 428, subclass 35.8.

II. Claims 16-20, drawn to a metal fuel tank, classified in class 428.

III. Claims 31-38, drawn to a method of preparing a fuel tank assembly, classified in class 156.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other and materially different product such as attaching components to a metal fuel tank rather than a plastic fuel tank.

Inventions II and III are related as process of making and product made. The inventions are distinct if either or both of

the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other and materially different product such as attaching components to a plastic fuel tank rather than a metal fuel tank.

Inventions I and II are constituted patentably independent inventions. The materials used are completely different, including the adhesives used to bond sections of the tank. Therefore, the structure of the two inventions is materially different articles.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. An attempt to make a telephone call to Nemias Damolcles was made on February 25, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made, because the telephone number given in the case is no longer in service.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher P Bruenjes whose telephone number is 571-272-1489. The examiner can normally be reached on Monday thru Friday from 8:00am-4:30pm.

Art Unit: 1772

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on 571-272-1498. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
